31 March 1961

MEMORANDUM FOR:

SUBJECT: Limited War Study

Attached herewith is a copy of the study on limited warfare which has recently been prepared by the CIA Reserve Panel. This study is a logical follow-up of the study on nuclear war which was published by the Panel on 1 January 1958. It is believed that you will find the study very worthy of your attention, particularly in view of the current heightened attention being given by the new administration to limited warfare and to countering of communist subversion.
